CIVIC & URBAN FURNITURE

The Boulevard Range

Specialty Ranges

4219/1

4558/1

Modern elegant style

Designed with a simple elegance, the Boulevard range of street furniture comprises a seat, bench, bin surround and bollard. Tree guards are also available to order.

The seat and bench shown here are constructed from hot dipped galvanised mild steel with a powder coated finish. Versions incorporating cast aluminium, aluminium RHS slats, timber slats and complete stainless steel construction are also available.

The construction and finish of each item can be tailored to match existing street furniture or as part of a total streetscape or shopping precinct development.

Sleek bollard design

Promenade items featured from top: park seat, bench seat, 120 litre wheel bin surround and cast aluminium bollard.

Simple sophistication

The Promenade is the second range in our specialty collection and is distinguished by the sleek curve on the leg support. Comprising a seat, bench, bin surround and bollard, tree guards are also available to order.

The seat and bench shown here are constructed from hot dipped galvanised mild steel with a powder coated finish. Versions incorporating cast aluminium legs, aluminium RHS slats, timber slats and complete stainless steel construction are also available.

The Esplanade Range

Specialty Ranges

Side profile of seat and bench

Esplanade items featured clockwise from top: bench seat, cast aluminium bollard, park seat and 120 litre wheel bin surround

Clean and contemporary

The Esplanade has been designed to complement the modern lines of today's streetscape and shopping plaza developments. Both the seat and the bench have simple curved supports that can be set into the ground or bolted down. Options for the slats include wood and powder coated steel in a colour to suit your scheme. The bollard and bin surround complement with their notched and textured finishes.

The seat and bench shown here are manufactured from mild steel which is hot dipped galvanised with a powder coated finish. Versions incorporating cast aluminium legs, aluminium RHS slats, timber slats and complete stainless steel construction are also available.

Millennium Range

Specialty Ranges

Furniture for a new age

The Millennium Range was designed with a futuristic feel while providing functionality and comfort in high traffic commercial areas.

Frames are cast in aluminium and then polished or powder coated in a choice of colours. Slats on both the seat and the bench are either powder coated aluminium or furniture grade jarrah.

Millennium can be surface mounted, free standing or installed in ground and will provide years of low maintenance service.

Seating as flexible as you are

The Metropolis range was developed to provide solutions in busy city locations where public seating needs to be flexible. Offering straight, concave and convex configurations for seats and benches this really is the seating system for the modern city.

All steel construction is zinc plated and available in a variety of polyester powder coat finishes. The expanded mesh provides strong comfortable, ergonomic seating.

The range is complemented by a picnic set and a range of bins with stainless steel lids and galvanised bin liners.

Bollards

Our extensive range of bollards will complement any style of streetscaping and architecture. They are manufactured in a variety of materials including corrosion free aluminium, heavy duty high strength steel and stainless steel. They are painted using a UV resistant polyurethane powder coat to suit your colour scheme.

All bollards are available as either inground or base plated with a removable option. The removable bollards can be locked into a sleeve by either a padlock or our unique key operated top locking device.

Litter Bins & Entry Lids

Standard Products

Litter Bins and Entry Lids

We have designed and manufactured many of the litter bins and entry lids that you see everyday along shopping strips, in shopping centres and in public open spaces.

The bin surrounds and entry lids shown here are just a small example of the possibilities with surround designs, covers, materials and finishes. We manufacture in mild steel, stainless steel and aluminium with powder coated or polished finishes. Perforations on bin surrounds can be custom designed and cut to marry perfectly with architectural features or logos. The range of possibilities is unlimited.

You may already have street furniture installed where a style needs to be maintained or you may want a proposal that requires consultation on the best materials and methods for the manufacture of your bins and their placement in the environment.

As experts in this field we welcome the opportunity to work with you to achieve your desired result.

Automatic locking security clamp to suit 80/120/140/240 litre wheel bins. Supplied in single or double bin configuration on posts for in-ground or bolt down (base plated) installation. Unique design allows for wall mounting as well. Standard finish: hot dipped galvanised.

Timber and Steel Slatted Frames

A variety of timber and steel slatted frames are available to suit 55 or 82 litre capacity. Frames can be tapered or parallel. Galvanised liners, covers & posts available.

Seats

Seating for every budget

Our seats and benches cover a wide variety of styles and materials to suit any budget. From contemporary through to heritage designs they provide the flexibility in size and range that is often sought but seldom found. The seats and benches shown here are a small selection from the range that we manufacture. If you require an alternative style of seat or bench we will work with you to manufacture to your specifications.

Tree Guards, Planters and Grates

5001 Sandhurst

5012 Hardware St

5021 Promenade

5022 Boulevard

Style and function

Tree guards are a practical and stylish way to protect trees from animals and vandalism. Manufactured in mild steel and then hot dipped galvanised and powder coated, the tree guards can be customised to your streetscape colour scheme. Designs to match existing street furniture or fabrication of a brand new style are also part of the service. The examples shown above are just some of the many designs

5209 Free standing

5213 Post/wall mounted

A growing concern

There are many styles and shapes of planters available in our extensive range or we can design and develop a customised product to suit your particular requirements. All mild steel body components are hot dipped galvanised prior to coating in the colour and finish that suits your environment.

Made to measure

Utilising the precision of laser cutting technology, we can design and manufacture tree grates in almost any shape, size or pattern imaginable. Strength and durability are assured by using mild steel which is hot dipped galvanised and coated in bitumen paint after fabrication. All tree grates can be supplied as either two or four part units and come complete with a frame.

Shelters

Eastland Bus Shelter

Coaches box

Manningham Shelter

2001 Ultra

Protection from the elements

Shelters for bus stops and sporting facilities are another product that we have designed and developed over the years. The shelters shown here are just a few from a collection designed by us. Built to last they incorporate features such as ergonomic seating, internal drainage and laminated safety glass. They generally require minimal site preparation prior to installation and minimal maintenance after completion. Design and colour schemes can naturally be tailored to match existing streetscape furniture.
